

This course allows high-performing managers to consider how their leadership style and the culture in their workplace affects results and provides effective tools to set and lead organisational direction.

The course focuses on the higher value skills of leadership and gives delegates the opportunity to assess their natural leadership style and how they can adapt it to get the best from different business units, people and situations. The material helps managers to understand the cultural impact they have and how this affects their ability to motivate people to achieve their organisation's (or department's) goals. It looks at how to consider day-to-day interactions such as giving feedback in such a way as to generate the desired behaviours.
